Description :

Heapro Yellow Nape Type Safety Helmet

Technical Specification :

In any industrial setup, be it a construction site or a manufacturing unit, the safety of worker(s) is an utmost priority. It is important to equip the workers with proper safety gear to ensure maximum safety at the workplace. Heapro is a well-known brand for safety helmets. safety helmet protects against injuries during falls, trips and collisions. These helmets are designed while giving special attention to ensure better safety and maximum comfort as they are worn continuously for long durations.

It also withstands flame, offers better water absorption and good functionality. Safety helmet weight is also very important due to various ergonomic benefits, and provides the perfect balance for maximum stability and comfort. It is made up of reinforced HDPE that provides complete head protection. While selecting the right helmet, several factors need to be taken care of; these include a safety helmet harness, suspension, cradle & headband. Heapro ensures superior quality and meet safety helmet standards while focusing on the safety of the wearer.

The safety helmets are available in several colours. Yellow safety helmet is standardized for General labours and earth moving operators that indicates a working without any specialty. Safety helmet colour plays an important role in defining its significance for application and the profile of the worker.
